

DIY Paper Boat

For this activity you only need one sheet of craft or construction paper.
Feel free to add your own decorations to your boat
with whatever you have at home!

Fold paper in half end to end.

Fold corners of folded edge down so
edges meet at the center; crease.

Fold up the top layer of the remaining
rectangle for a cuff.

Turn paper over.
Fold up remaining layer for another cuff.
Fold down the corners of both cuffs,
following the angle of the triangle's
sides.

Pull long sides out so the bottom corners come together to create a diamond shape; crease.

Fold up one bottom corner, making a triangle; crease.

Turn paper over. Fold up remaining corner; crease. Repeat step 6 to make a diamond.

At the diamond's top, pull flaps out and away from center tip in a single smooth motion.

Pinch boat's bottom edges and pull out so it stands. Decorate boat how you would like and you are ready to sail!

Thank you for participating! If you want to share what you made you can send to education@americanswedish.org
