

# Woven Paper Heart Craft

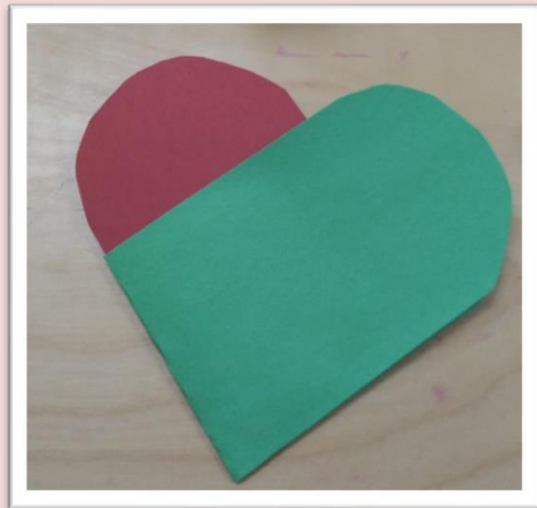

## Materials:

- 2 pieces of colored construction paper. Folded in half with curve cut at the open end.
- 1 piece of construction paper that is long and skinny
- Small paper squares
- Glue
- Scissors

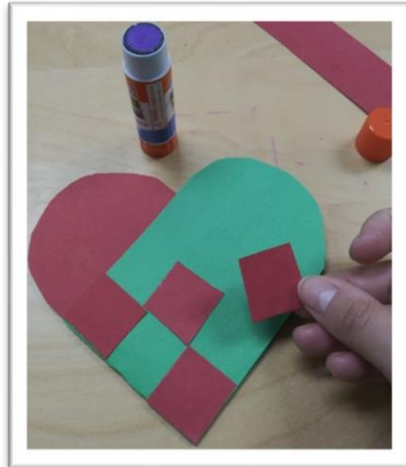

## Directions:

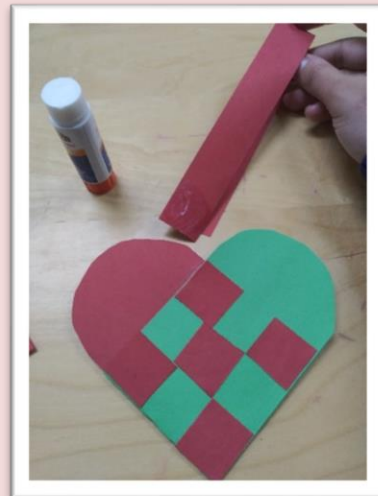

1. Cut out curve shape on the two large pieces of construction paper.
2. Glue those two pieces together so that the corners meet and make a pocket. This will also make the heart shape.

3. Glue squares pieces on top to make the woven pattern by making the corners of each piece touch. Do this on both sides of the heart.

4. Next glue bottom of handle and attach to the inside of the heart.

5. Your heart is down and you can hang it on your tree or anywhere you want!
